Question 1

Revisit Later

How to Attempt?

Read second word and change to Uppercase: Write a function (method) that takes as input a string (sentence), and returns its second word in uppercase.

For example -

If **input1** is "Wipro Technologies Bangalore", the function should return "TECHNOLOGIES"

If **input1** is "Hello World", the function should return "WORLD"

If **input1** is "Championship 2017 League", the function should return "2017"

If **input1** is "Hello", the function should return "LESS"

NOTE 1: If **input1** is a sentence with less than 2 words, the function should return the word "LESS".
NOTE 2: The result should have no leading or trailing spaces.

JAVAB

Compiler: Java - 1.8

```
1  import java.io.*;
2  import java.util.*;
3
4  // Read only region start
5  class UserMainCode
6  {
7
8      public String secondWordUpperCase(String input1){
9          // Read only region end
10         // Write code here...
11         String strArray[] = input1.split(" ");
12
13         String stt="LESS";
14
15         if(strArray.length==1) {
16
17             return stt;
18         }
19
20         return strArray[1].toUpperCase();
21     }
22 }
23
24 }
```
